Gentlemen

- We wish to be a Corporate Sponsor of THE COMPUTER DISPLAY REVIEW and agree to pay, when invoiced, a one-time fee of \$750. It is understood that this fee includes one annual subscription to the REVIEW.
- We wish _____ annual subscriptions (in addition to the above), at the rate of \$150, sent to the same address as below, or to the addresses given on the attached sheet, billed to the same address as below or to the addresses given on the attached sheet. We are eligible for the \$150 rate because:
 - We are a Corporate Sponsor.
 - We are a bona fide agency of the government of the United States or of Canada, both of which are Corporate Sponsors.
 - We are an accredited university, college or secondary school, for which the Corporate Sponsorship fee has been waived.
 - We believe our organization may be a Corporate Sponsor. If it is not, please advise us but do not enter this subscription order.

TERMS OF AGREEMENT

By making THE COMPUTER DISPLAY REVIEW available on a subscription basis to Corporate Sponsors, the substantial cost of producing it — which would be prohibitive for any one client — will be shared by interested firms and government agencies.

Corporate Sponsorship

The Corporate Sponsorship fee of \$750 is a one-time charge which includes one annual subscription to the REVIEW. This comprises the basic report, current as of the start of the subscription, the updating supplements issued at four-month intervals, and any special supplements warranted by highly significant developments in the computer display field.

Additional Subscriptions

Since many of the larger Corporate Sponsors will find it desirable that their field offices and other organizational subdivisions have copies of the REVIEW, additional annual subscriptions are available at \$150 each. Orders for additional subscriptions may accompany the Corporate Sponsorship order or be placed at any time thereafter.

Annual Renewals

Renewals of annual subscriptions, whether corporate or additional, may be made at a charge of \$150. This will entitle the subscriber to the three updating supplements issued during the year as well as the special supplements previously mentioned.

Multiple Orders

If more than one order for a Corporate Sponsorship is received from any firm, government agency or a subdivision thereof, the second and subsequent orders will be invoiced at \$150 and the subscriber informed of this change. On the other hand, if an order for a subscription at the \$150 rate is received from a subdivision of a firm or government agency that is not a Corporate Sponsor of the REVIEW, the originator of the order will be so notified and given the option of changing the order to a Corporate Sponsorship at \$750 or withdrawing the order. Information regarding the status of a prospective subscriber will be furnished by Adams Associates, upon request, prior to the placement of an order.

Order Form

The use of the order form on the reverse side of this enclosure is optional. (If used, the extra copy is for your records.) Adams Associates will be pleased to accept alternative types of procurement requests. To ensure prompt receipt of the report and supplements, complete mailing information should be given.

COMPUTER PROGRAMMING AND CONSULTING SERVICES

ADAMS ASSOCIATES PUBLISHES NEW REVIEW

Cambridge, Massachusetts, August 1, 1966 --- Charles W. Adams, president of Adams Associates, announced that the first issue of THE COMPUTER DISPLAY REVIEW, a publication of far-reaching significance to all who are concerned with any aspect of computer graphic displays, was mailed today to pre-publication sponsors and subscribers. These include many agencies of the Federal government and armed forces, computer and display equipment manufacturers, industrial organizations, research and development laboratories, and university computation centers --- a clear indication of the wide range of interest that alphanumeric and line-drawing displays hold for businessmen, industrialists and scientists.

In its many years of developing and working with computer-based display equipment and techniques, Adams Associates has long recognized the need for a single source of information and critical evaluation of this entire field. THE COMPUTER DISPLAY REVIEW answers this need. Divided into seven sections containing more than 500 pages of text, tabular and illustrative material, the information in it results from an intensive effort by Adams Associates during the

past year to gather, analyze and evaluate data on all display equipment now available or under development in the free world.

"As consultants rather than publishers," Mr. Adams said, "we are offering not a book but a service. To keep our subscribers abreast of the latest developments in this rapidly expanding field, a full-time staff will continue its research, visiting equipment manufacturers and field installations. New developments in display hardware, software, applications and trends will be thoroughly evaluated and information on them released in the form of supplements every four months. In addition, abstracts of timely articles on applications and techniques as well as papers contributed to or written expressly for the REVIEW by well-known specialists will be included."

By making THE COMPUTER DISPLAY REVIEW available on a subscription basis to corporate sponsors, the substantial cost of producing it --- which would be prohibitive for any one client --- will be shared by interested firms and government agencies. The corporate sponsorship fee of \$750 is a one-time charge which includes one annual \$150 subscription to the REVIEW. All additional subscriptions and renewals are \$150 a year. Since both the U.S. and Canadian governments are already corporate sponsors, all of their agencies are eligible for the \$150 subscription rate. So too are all accredited universities, colleges and secondary schools, for which the corporate sponsorship fee has been waived.
